GainEdge Consulting

Partners in Smarter Procurement

Reference Case

Reference Case:
Spend Analysis

For one of the US based Consulting companies.

One of the US based Consulting companies approached us for helping them with their spend data categorization. The data consisted of 20% tail spend for one of their big clients.

The challenge for GainEdge was – the data was massive and we had a very strict timeline to present with the results. Team GainEdge put their best resources to work and got the data cleansing done in the first phase. Post this, after receiving custom Taxonomies from the customer, we categorized all the spend data within permissible timelines.

We submitted the detailed reporting based on our spend data categorization to the customer's delight and satisfaction.

GainEdge Consulting Pvt Ltd
